

## Memorandum

**To:** Beaverton Planning Commission  
**From:** Glen Bolen  
**Date:** 1/17/2018  
**Subject:** Packet Materials - Instructions for replacement of content  
**Project No.:** 16985 South Cooper Mountain Heights PUD

Following original submittal of the application to modify the South Cooper Mountain Heights PUD the applicant, working with the City of Beaverton has developed a revision to the proposed phasing of the development. Two sections of the application are affected by this change. They are:

1. The application narrative which was modified to describe the new boundary
2. Plan Sheet P2.0r which shows the phasing boundaries on a map

Therefore, this delivery contains these two sections for replacement in the Commissioner binders.

To update your packet you will replace the narrative and Plan Sheet P2.0r from your binder with these new materials.

1. For the narrative, please remove, in its entirety, all of the pages included in the binder, replace them with the new narrative section.
2. The plan sheets are folded 11X17 pages and are found behind tab X. As with the narrative, please remove all of them and replace with the new set of plan sheets included in this delivery.

Please recycle the removed pages.

All Commissioners should also have received a silver colored USB drive. This drive contains a digital set of the plan sheets for this application, and a set of plan sheets of the entire PUD as approved in 2015. With these files, those who wish, are able to view the materials on their computers.
