#### Wetland/Waterway/Other Water Features

- There are/may be wetlands, waterways or other water features on the property that are subject to the State Removal-Fill Law based upon a review of wetland maps, the county soil survey and other available information.
- The National Wetlands Inventory shows wetland, waterway or other water features on the property
- The county soil survey shows hydric (wet) soils on the property. Hydric soils indicate that there may be wetlands.
- The property includes or is adjacent to designated Essential Salmonid Habitat.

#### Your Activity

- It appears that the proposed project **may** impact Essential Salmonid Habitat and, therefore, **may** require a State permit.

- It appears that the proposed project **may** impact wetlands and **may** require a State permit.

## Applicable Oregon Removal-Fill Permit Requirement(s)

- A state permit is required for 50 cubic yards or more of fill removal or other ground alteration in wetlands, below ordinary high water of waterways, within other waters of the state, or below highest measured tide.
- A state permit is required for any amount of fill, removal, and/or other ground alteration in Essential Salmonid Habitat and within adjacent off-channel rearing or high-flow refugia habitat with a permanent or seasonal surface water connection to the stream.

## Closing Information

### Additional Comments

This project has a concurred delineation (WD2023-0315). Any work within the OHWL of Willow Creek may require a permit. Work in the identified wetlands will require a permit for impacts that are 50 cubic yards or greater. Best management practices for sediment and erosion control are recommended during trail replacement.

For further questions on permitting, please contact Michael De Blasi at (503) 509-0460

**This is a preliminary jurisdictional determination and is advisory only.**

This report is for the State Removal-Fill law only. City or County permits may be required for the proposed activity.
