Subject: Bullet points

Rooted Care is invested in the community. As a company it has at its core to serve our elderly with where they are. We meet the needs and desires of them and their family without discrimination and encourage diversity and compassion.

We have done many things to become a part of the community and to make a positive impact in our area. Most of our residents come from within the neighborhood. We recently did some respite care for a gentleman who lives just a few blocks away and the week before he joined us for a short stay his wife called Melissa for some help on what to do because he had fallen, and she could not help him up on her own. We had enough people at the house that we were able to go and help him up.

Melissa has also hosted 2 community events the first being an easter egg hunt and the second being renting a shave ice truck for some cooling treats during this summer's heat.

Rooted Care's goal at its core is to serve the community by giving the very best care in a setting that is not institutional and feels more like home. One of the greatest things is that because we are close to our families they can come for a visit while walking their dog or on an evening walk.

Makayla Nelson.
