Hello from Heights At Progress Ridge Owner

Specific concerns to limit the project to 85 units per space provided. How are the bald eagles that nest in the redwood trees for the last 10 years going to be protected? They fish in the lake and teach their young how to fly and fish at Progress Lake. Is there an entrance from Scholls Ferry Road? If there isn't, there needs to be. The one way streets of Sparrow Loop can't handle the traffic. How is the lack of street parking going to be addressed? There isn't enough street parking to handle growth of a 96 unit building. Thank you, Karen Wolfe 15205 SW Sparrow Loop, Beaverton OR 97007. Resident since 2005

---

Thanks, I have a lot of questions, but I'll include them in my comments.

What's a major pedestrian walkway? The application states that Scholls ferry road isn't one, is that designation already been made? Does the construction of the project preclude that designation from happening in the future?

I'm mostly concerned with traffic and parking. Beaverton is working with the neighborhoods off Barrows, including Windsor park to address significant traffic issues along Barrows road. A study is being done on ways to improve safety, given the multiple accidents, including a pedestrian death on Barrows. Does the proposed development acknowledge the safety issues and the study that will be conducted? This development will provide access through the neighborhood to Barrows, significantly increasing the traffic burden there. Also, what measures will the developers take to prohibit/restrict parking in the adjacent neighborhood? There won't be adequate parking for the residents in the apartment complex, so where is the overflow expected to go?

If you can point me to the relevant sections I would greatly appreciate it.

I'll provide more detailed comments later.

Thanks

Scholls Ferry Apartments DR2022-0046/ TP2022-0007/VAR2022-0001

To whom it may concern;

I write again to inform the planning committee how wrong this current development plan is for Beaverton. I have attached my first email below since it has been over a year. In that time I will acknowledge that the developer has made two noticeable changes since the previous plan. It has reduced the buildings to two from three and has included more parking. Overall the main problems that don't seem to fit with Beaverton and it's comprehensive plan persist. Most importantly the opening of Winterhawk Lane to the two apartment complexes. Again I highlighted below how detrimental this would be to the Windsor Park neighborhood. The main solution for this would be using the current entrance off Scholls Ferry. This seems to be the only agreeing point I would have with the developer who also want to use that entrance. The increased traffic through Windsor Park would destroy the quality of life of an established Beaverton neighborhood. Windsor Park is the type of neighborhood that people move to Beaverton for. It makes sense to have a direct entrance off Scholls with a light to decrease congestion at the current non light intersection at Sagehorn. It also makes sense to put a light and intersection off the current Scholls entrance for the complex if there is ever a possibility to have a crosswalk due to a possible park across the street or with having a pedestrian path to Scholls with the new development. It might be thought that people would walk up to the current light to cross but people will take the shortest distance more often than not. It has already been pointed out for cars that there is not a lot of visibility which would require a traffic signal. Also as someone who crosses Scholls Ferry at the current intersection walking my kindergartner to school cars drive fast and would not be able to respond properly to people crossing.

The other concern with this development continues to be the size. A five story apartment complex will tower over the current neighborhood. The current plan seems to be squeezing an unrealistic number of units on a small not very developable lot. The plan is to have 96 units on buildable land less than an acre. In comparison there is a proposed development further down Scholls Ferry along Tile Flat for a 216 unit complex compromised of eight three story buildings. This development is on a significantly larger piece of land than the Scholls apartment complex yet the Scholls complex is almost half the amount of units. This highlights that the other complex is a well planned and thoughtful use of land for high density residential. This also highlights how unrealistic it is to try and develop the lot adjacent to Windsor park as high density. The plan put forth by the developer to only have one and two bedroom

apartments does not seem aligned with the Beaverton comprehensive plan for housing which highlights the need of more single families residential or medium density housing. Limiting the complex to one and two bedroom apartments does not seem profitable for the developer or right for the need of southwest Beaverton. The current apartment complex in the same area seems to have a constant supply of one and two bedroom apartments available for rent but it's three bedroom apartments are leased. Having open apartments or constant turnover would not be profitable for the developer vs having larger units that would appeal to a family that might retain a long term tenant. This just shows the current plan doesn't seem in tune with the neighborhood. The draw of the neighborhood is for families and the great schools with the nice amenities of living near progress ridge. This brings me to the second ask from the planning committee, other than the Scholls entrance, is to change the zoning of this lot. It was perceived that this lot should be part of the town center but it was not planned out to connect with the town center. I touched on why the zoning should be changed in my previous email as well below but it appears that the developer is not interested in changing the zoning or building a complex that fits the needs of neighborhood in the space available. This lot should at most be medium density which Beaverton has a real need for in the community. There is such a need for medium density housing that Beaverton is going to change all residential zoning to be able to accommodate more medium density housing. There are multiple apartment complexes currently in the neighborhood or to be added to the neighborhood with the development around the high school and down to Tile Flat Road. If this lot was across Scholls Ferry I have no doubt it would be zoned residential and be houses or townhouses. Again change the zoning to medium density to accommodate duplexes, triplexes or townhomes, which could accommodate one entrance from the current apartment complex and/or entrance off Scholls. The only scenario that I see opening up Winterhawk Lane would be to change the lot to be zoned for single family homes that would be an extension of the current neighborhood with no connection to the current apartment complex. I believe that was the only intention of the previous planning to extend Winterhawk Lane.

I ask the planning committee to follow the plans that it has set out in the comprehensive plan and see how this development does not fit. This development needs editing to not sacrifice the quality of life for a well established Beaverton neighborhood. Most importantly do not open Winterhawk Lane and change the zoning for an appropriately sized development for a small lot that will create valuable housing for families that need it.

Sincerely,  
Megan Springsted

To whom it may concern;

I write to you today as a concerned citizen. I am a resident living in the Neighborhood Southwest where there is currently a good amount of new growth and development. I live specifically in Windsor Park an established low/standard density neighborhood adjacent to Progress Ridge Town Center (also known for land use purposes as Murray Hill Town Center). Currently there is a plan to develop the last available lot in the Progress Ridge Town Center that is directly adjacent to Windsor Park. The current plan is looking to develop one and two bedroom apartments using town center- high density residential zoning (TC-HDR) and connect Windsor Park to this new apartment complex along with another recent apartment complex.

This is the wrong plan for this undeveloped lot. I have a lot of concerns based on the change to the landscape of tearing down mature trees and the effect it would have of opening up a quiet residential loop to two apartment complexes with little parking for its residents but first I want to start with the infringement of prior plans or standards held by the City of Beaverton in regards to land use.

The Beaverton Comprehensive Plan defines a Town Center as tending to have 1-3 story developments and provide services to surrounding community with a mix of housing and commercial. The goal stated in the Comprehensive plan is to meet needs within town center. This seems to me that housing associated with the town center would feel incorporated into the town center community and have access to said town center. The plan set forth for the apartment community would have no direct connection to Progress Ridge. If looking at a map the best way to incorporate the lot into Progress Ridge would be a connection through Mallard Drive rather than through Winterhawk Lane. I know that there is currently more infrastructure in place for Winterhawk Ln and that an argument posed was that the road was set up for further development connection at some point. Instead the dead end qualifies the neighborhood as meeting the standard definition of a neighborhood per Comprehensive Plan defining neighborhoods as built with larger collector roads connecting between neighborhoods and many dead ends. Maintaining Winterhawk Ln as a dead end would not be out of the ordinary and common for a neighborhood.

Another area where the current development seems to be a deviation from previous plans or zoning is that it is considered TC-HDR. According to the 2005 Plan Concept map the area in question is zoned Town Center Medium Residential. Also in the Land Use Element 2040 Plan Murray Scholls Town Center (Progress Ridge) is allowed to have R-4 zoning. The Beaverton Comprehensive Plan considers medium density (R-4) may serve as a transition between standard density neighborhoods and higher density neighborhoods, commercial, or mixed use designation. This seems to be the exact situation for this development to use. The available lot is located between standard density neighborhood (Windsor Park) and a higher density neighborhood (Trillium Woods Apartment Complex). The plan with the city previously was to utilize medium density in the town center zoning therefore it can be implemented for this lot. As a resident of Windsor Park I would feel better with medium density versus high density scrunched in a small lot.

Another concern is the size of the buildings for the proposed apartment complex. Per their presentation there would be three apartment buildings with 96 units. Two three story apartment buildings and one five story apartment building at the front of the complex. There are no other buildings that tall in the vicinity of the area. This seems too tall for the recommended guidelines to build near an existing neighborhood. In the Land Use Element 2040 Plan it recommends building heights of 35 ft within 100 ft of existing family residences. I do not have the exact distance the building would be from Windsor Park established homes but I can imagine it would be fairly close to this range since per the proposal by the developer

it states the widest part of the lot is 232 feet. This plan seems to infringe on the goal set for neighborhoods in the Land Use Element 2040 Plan in providing for the establishment and maintenance of safe, convenient, attractive, and healthful places to live with Action #1 being buffering to prevent impact. If the connection of Winterhawk Ln is made to two high density housing complexes this goal would be broken for Windsor Park. On the presentation from the developer it appears that Progress Ridge is being buffered from this complex. The mature tree line is left on the east side screening the town center from the proposed complex that belongs to the town center. Where on the west side mature trees will be taken out with a six foot barrier fence placed to buffer Windsor Park. It appears to me that the development looks to be more incorporated into Windsor Park neighborhood and not Progress Ridge.

Lastly I would like to bring up The Land Use Background Report from 2016 which states in regards to Progress Ridge Town Center that relatively little land remains and what does tends to have access or other challenges that make it difficult to develop. The report predicts 100-360 housing units available. The town center has already met the minimum goal of additional housing from this report with the addition of Trillium Woods apartment complex. Any further housing would just be in addition to what is already excepted for the town center and not necessary to hit a certain number for high density. Another good reason to implement medium density for said lot. Another point from the Land Use Background Report is the Plan from the start with the development of Progress Ridge Town Center. One of the main goals from the beginning is to minimize impacts to existing development. Implementing the development plan as is would have an enormous impact on Windsor Park. It would change the landscape, the traffic, the parking, the home values, and crime rate. It seems logical to not link a standard density neighborhood to a high density neighborhood. Especially since the city likes to use medium density housing as a buffer. It feels like if there is connection between those two types of neighborhoods you are ultimately changing the density of the low density to a higher density neighborhood. There also is a concern for safety in regards to a connection with traffic around children playing and with emergency services access to a 96 unit apartment complex accessed through a residential neighborhood. Again I believe this is the wrong plan in the current state. If the land must be developed, change it to medium density as it should be per previous plans. If the lot was developed as medium density using the 78,600 net feet number from the developer it would put the complex under 25 units and could be on a closed end street per city ordinance with no need to develop Winterhawk Ln. Most important to Windsor Park would be to find a different route other than punching through Winterhawk Ln. I am sure all residents of Windsor Park would support another traffic signal on Scholls Ferry if it meant Winterhawk Ln was untouched. If Scholls is not an option look at Mallard Drive. It would incorporate the new development into the Progress Ridge Town Center, the community it is suppose to belong to per definition of a town center. Most of all preserve the beautiful Windsor Park neighborhood. Beaverton's older established neighborhoods are becoming a unique site with all the new construction and development. Older neighborhoods deserve to be preserved and not degraded with trying to force as much density as possible into small infill development lots.

Thank you for your time and careful consideration of this development.

Sincerely,  
Megan Springsted

Hello Steve,

I am a homeowner on Winterhawk lane that will be directly affected by this apartment complex. Will you please email me a copy of the complete application to review? We have been battling this for years and have had many public hearings. Will the comments and concerns from those previous public hearings also be taken into consideration when making the decision to approve or not? Thank you so much for your help.

Thanks,

Heather West

Hi Steven,

I hope this note finds you well and you are having a nice summer! Thank you for taking the time to read written feedback/testimonies from the community, it is much appreciated! I live on Winterhawk Lane in the Neighbors Southwest Community of Windsor Park and I'll try to be as brief as possible as I'm sure you've received quite a few notes from our community.

Regarding the proposed apartment development in the lot adjacent to our neighborhood, the lot just feels like an odd spot for a 96 unit development with how tight of a spot it is and the existing wetlands. It feels like more medium density dwellings like townhomes would be better suited for this space given the limited space and fit better with the nearby townhomes off of Segehen and Mallard Dr. I'm certainly not a developer or planning expert but one of the smaller, medium density developments like [12109 SW Tesla Terrace, Beaverton, OR 97008](#) or [4710-4718 Oscar Ln, Beaverton, OR 97007](#) feel like a better fit here. There are also larger apartment complexes being built or already built further down Scholls and there is certainly a need for more medium density affordable housing in the community. I know such a compromise is unlikely but just wanted to pose that suggestion.

That said, my primary concern is the developer's plan to connect directly to SW Winterhawk Ln. The additional traffic congestion from a 96 unit complex moving through the neighborhood is a huge safety concern for our community. There are many families with small children (including my own) and the increased access would greatly increase the risk of tragic accidents. The roads within the neighborhood are not wide enough for frequent two way traffic with cars parking along the curb so adding an additional 100+ cars passing through would be a real problem. Connecting High density to existing roads designed for Low density just seems like a bad fit.

The increased congestion and speed has already been an issue within our community as evident by recent accidents and the tragic pedestrian fatality at the lower entrance of our neighborhood at [Barrows](#) a few months ago. The added traffic moving through Windsor Park if this development directly connects would just increase the likelihood of another tragic accident.

The traffic light crossing at Scholls and 158th is already quite dangerous and school children often cross here moving to and from Scholls Heights Elementary. Adding more traffic to this light would make this intersection significantly more dangerous. Is there an option for the development to directly connect to Scholls (as opposed to Winterhawk) and have an additional traffic light added to improve safety? More traffic control in general is needed with the growth of the area.

This got much longer than I had planned (and I didn't even talk trees!) so I won't add anymore. Again, thank you so much for your consideration and taking the time to read this message.

I hope you have a wonderful long labor day weekend!

Thank you!  
Eric Springsted

Hi Steven,

One more question and then I'll leave you alone :) . Your response about WA County having jurisdiction over Scholls Ferry sent me down a rabbit hole of looking through the county dept of Land Use and Transportation plans and I came across this 2019 plan linked below:

[Link to plan](#)

On page 59 of the plan it shows Scholls as an arterial route (red orange) and neighborhood routes in blue. In my screen shot, the dotted blue is a proposed neighborhood route linking the existing Trillium Woods Apartment complex down to Mallard Drive. Mallard has much better access and integration with the shopping center, etc. Would this be possible as an alternative option vs connecting to Winterhawk? I know there are wetlands on the property but that usually doesn't stop development. Seems like it was in a plan for the county at some point if i'm reading this correctly.

Thanks again!  
Eric

On Tue, Aug 30, 2022 at 2:19 PM Steven Regner <[sregner@beavertonoregon.gov](mailto:sregner@beavertonoregon.gov)> wrote:

Good Afternoon Eric,

Thank you for taking the time to reach out and share your concerns about the Scholls Ferry Apartment building. This email will be included with the package that goes to Planning Commission for consideration. I did want to respond to your question about connecting directly to Scholls Ferry Road. That was an approach explored early in the process by the developer, but Washington County, who has jurisdiction over Scholls Ferry Road, has access restrictions due to the volume and speed of traffic on the road. The potential access point for the apartments on Scholls Ferry are too close to both SW 158<sup>th</sup> Avenue and SW 155<sup>th</sup>, thus the access prohibition.

I understand your concerns about the new connection via Winterhawk, but I hope at least this helps explain the reasoning behind the circulation approach.

Thanks,

**Steve Regner**

**CAUTION:** This email originated from outside the City of Beaverton. Exercise caution when opening attachments or clicking links from unknown senders.

Steve,

I am writing to you because I was just made aware that community feedback has been requested for the proposed apartment complex at 15584 SW Schols Ferry Road. As the HOA President for David's Windsor Park HOA, I thought I would have received a letter regarding the public hearing notice, but instead one of the residents of the HOA advised that they have received a notification letter through the mail. It appears some notifications have been sent out, but only to a small segment of David's Windsor Park community. Some of our resident's property directly touches the site of the proposed apartment complex, but all residents will be impacted with increased traffic through the neighborhood and street parking impacts.

As you may be aware, we have recently had several traffic related incidents around the Barrows Road / Schols Ferry road area (South Beaverton / Tigard border), and the community has safety concerns. The proposed apartments will not have enough parking for 96 units, and overflow can be expected to span out to Winterhawk Lane and SW Sheldrake. Parked cars lining both sides of the street decreases visibility, and increases the risk of pedestrian/auto collisions.

The proposed apartments with a Schols Ferry address will not have direct access to Schols Ferry, rather new residents will have to traverse through neighborhood streets, including several stop/yield signs to circle back to Schols Ferry or travel south down to Barrows. At this point I have not heard of any plans to help mitigate the parking and traffic issues this proposal will cause. I understand the developer is asking for a variance to the city code for set back requirements, but we need to understand what they are proposing to address the safety concerns raised above. We have already lost one of our community members this year due to a car/pedestrian collision. Simply having the apartment managers ask residents to only park in the apartment's parking lot will not work, and is not realistic.

---

Thank you Steve. Is it possible to be included in future communications about the proposal and public hearings? I live at 12865 SW Harlequin Drive and none of my immediate neighbors have received the Public Hearing Notice; only a few members of David's Windsor Park HOA were included in the distribution. Or is the developer responsible for sending out the Public Notice?

Steve,

I am writing to you because I was just made aware that community feedback has been requested for the proposed apartment complex at 15584 SW Schols Ferry Road. As the HOA President for David's Windsor Park HOA, I thought I would have received a letter regarding the public hearing notice, but instead one of the residents of the HOA advised that they have received a notification letter through the mail. It appears some notifications have been sent out, but only to a small segment of David's Windsor Park community. Some of our resident's property directly touches the site of the proposed apartment complex, but all residents will be impacted with increased traffic through the neighborhood and street parking impacts.

As you may be aware, we have recently had several traffic related incidents around the Barrows Road / Schols Ferry road area (South Beaverton / Tigard border), and the community has safety concerns. The proposed apartments will not have enough parking for 96 units, and overflow can be expected to span out to Winterhawk Lane and SW Sheldrake. Parked cars lining both sides of the street decreases visibility, and increases the risk of pedestrian/auto collisions.

The proposed apartments with a Schols Ferry address will not have direct access to Schols Ferry, rather new residents will have to traverse through neighborhood streets, including several stop/yield signs to circle back to Schols Ferry or travel south down to Barrows. At this point I have not heard of any plans to help mitigate the parking and traffic issues this proposal will cause. I understand the developer is asking for a variance to the city code for set back requirements, but we need to understand what they are proposing to address the safety concerns raised above. We have already lost one of our community members this year due to a car/pedestrian collision. Simply having the apartment managers ask residents to only park in the apartment's parking lot will not work, and is not realistic.

Chris McDowell

Thanks, Steven.

Makes sense. Maybe an easier option would be to connect 155th Terrace across Scholls at the Trillium Apartments with a light and not cut all the way through to Mallard? This would also then create safer access to Scholls on both sides as many cars make left turns out of either 155th or Sagahen St. I assume that's been reviewed already but wanted to throw that out as well.

On Wed, Aug 31, 2022 at 9:20 AM Steven Regner <[sregner@beavertonoregon.gov](mailto:sregner@beavertonoregon.gov)> wrote:

Hi Eric,

Fair enough question. The Washington County TSP does have information about how connectivity will be improved over time, but those proposed lines are necessarily that precise. They haven't been engineered, nor have constraints truly been considered. The caveat at the bottom left of the page refers to this map as an unofficial representation.

On the true viability of that connection, there are some serious technical challenges. First, you note the wetlands that this road would need to cross. This is actually a much tougher proposition than many imagine. Impacting wetlands is difficult to get permitted, is extremely costly, from both an initial construction and mitigation standpoint, and frankly is just an undesirable sensitive area impact. The proposed development does steer clear of the delineated wetlands at the southern end of the site. On top of the wetland constraints, there are some pretty serious grades above SW Mallard, further complicating any vehicle connection .

I appreciate your thoughts in exploring alternatives, but this one may be pretty tough to accomplish.

Regards,

**Steve Regner**

Hi Steven,

One more question and then I'll leave you alone :) . Your response about WA County having jurisdiction over Scholls Ferry sent me down a rabbit hole of looking through the county dept of Land Use and Transportation plans and I came across this 2019 plan linked below: [Link to plan](#)

On page 59 of the plan it shows Scholls as an arterial route (red orange) and neighborhood routes in blue. In my screen shot, the dotted blue is a proposed neighborhood route linking the existing Trillium Woods Apartment complex down to Mallard Drive. Mallard has much better access and integration with the shopping center, etc. Would this be possible as an alternative option vs connecting to Winterhawk? I know there are wetlands on the property but that usually doesn't stop development. Seems like it was in a plan for the county at some point if i'm reading this correctly.

Thanks again!  
Eric

On Tue, Aug 30, 2022 at 2:19 PM Steven Regner <[sregner@beavertonoregon.gov](mailto:sregner@beavertonoregon.gov)> wrote:

Good Afternoon Eric,

Thank you for taking the time to reach out and share your concerns about the Scholls Ferry Apartment building. This email will be included with the package that goes to Planning Commission for consideration. I did want to respond to your question about connecting directly to Scholls Ferry Road. That was an approach explored early in the process by the developer, but Washington County, who has jurisdiction over Scholls Ferry Road, has access restrictions due to the volume and speed of traffic on the road. The potential access point for the apartments on Scholls Ferry are too close to both SW 158<sup>th</sup>

th

Avenue and SW 155 , thus the access prohibition.

I understand your concerns about the new connection via Winterhawk, but I hope at least this helps explain the reasoning behind the circulation approach.

Thanks,

**Steve Regner**

Hi Steven,

I hope this note finds you well and you are having a nice summer! Thank you for taking the time to read written feedback/testimonies from the community, it is much appreciated! I live on Winterhawk Lane in the Neighbors Southwest Community of Windsor Park and I'll try to be as brief as possible as I'm sure you've received quite a few notes from our community.

Regarding the proposed apartment development in the lot adjacent to our neighborhood, the lot just feels like an odd spot for a 96 unit development with how tight of a spot it is and the existing wetlands. It feels like more medium density dwellings like townhomes would be better suited for this space given the limited space and fit better with the nearby townhomes off of Segehen and Mallard Dr. I'm certainly not a developer or planning expert but one of the smaller, medium density developments like [12109 SW Tesla Terrace, Beaverton, OR 97008](#) or [4710-4718 Oscar Ln, Beaverton, OR 97007](#) feel like a better fit here. There are also larger apartment complexes being built or already built further down Scholls and there is certainly a need for more medium density affordable housing in the community. I know such a compromise is unlikely but just wanted to pose that suggestion.

That said, my primary concern is the developer's plan to connect directly to SW Winterhawk Ln. The additional traffic congestion from a 96 unit complex moving through the neighborhood is a huge safety concern [for](#) our community. There are many families

with small children (including my own) and the increased access would greatly increase the risk of tragic accidents. The roads within the neighborhood are not wide enough for frequent two way traffic with cars parking along the curb so adding an additional 100+ cars passing through would be a real problem. Connecting High density to existing roads designed for Low density just seems like a bad fit.

The increased congestion and speed has already been an issue within our community as evident by recent accidents and the tragic pedestrian fatality at the lower entrance of our neighborhood at [Barrows](#) a few months ago. The added traffic moving through Windsor Park if this development directly connects would just increase the likelihood of another tragic accident.

The traffic light crossing at Scholls and 158th is already quite dangerous and school children often cross here moving to and from Scholls Heights Elementary. Adding more traffic to this light would make this intersection significantly more dangerous. Is there an option for the development to directly connect to Scholls (as opposed to Winterhawk) and have an additional traffic light added to improve safety? More traffic control in general is needed with the growth of the area.

This got much longer than I had planned (and I didn't even talk trees!) so I won't add anymore. Again, thank you so much for your consideration and taking the time to read this message.

I hope you have a wonderful long labor day weekend!

Thank you!

Eric Springsted

[Trillium Woods Access Easements.pdf](#)

---

Thank you Steven,

I still have grave concerns regarding the functionality of the proposed application in the built and fully occupied condition if it ever gets that far. As I have stated to the Applicant and the City in the past, our Trillium Woods property has a parking ratio of approximately 1.4:1, which is a constant struggle with the tenants in this suburban area who provide constant feedback to our team that there is insufficient parking, as well as access to mass transit. The proposed Scholls Ferry Apartments development is still proposing an even lower parking ratio than the Existing Trillium woods.

The applicant also states that that only certain side of the elevations will be visible from a public street, however with these being 5-story structures, located at a higher elevation than the existing single family residences on SW Sheldrake Way, I would argue that the north, west and southern elevations will be visible from Sheldrake or Winterhawk, over the top of the single family homes.

Lastly, there is a major flaw in the applicant's proposal. The applicant has either not read or misunderstands the language in the deed for the existing Public Access Easement through the Trillium Woods property. Their Transportation analysis projects that 65% of their trips will travel through the Trillium Woods property, however, they do not have the legal right to do so. I have highlighted sections of the existing recorded access easement that discusses specifically who is, and who is not authorized to utilize that easement for ingress and egress. Official City Vehicles, Fire trucks, police cars, garbage trucks, mail carriers, Public Works staff, etc are authorized to use the easement, the general public are specifically not authorized.

Please let me know if you have any questions or comments.

Respectfully,

## PUBLIC VEHICLE AND UTILITY ACCESS EASEMENT

THIS PUBLIC VEHICLE AND UTILITY ACCESS EASEMENT ("Easement") is made on \_\_\_\_\_ by **Trillium Woods, LLC**, an Oregon Limited Liability Company ("Owner"), for the benefit of the **City of Beaverton, Oregon** an Oregon municipal corporation ("City").

### RECITALS

A. Owner owns the real property located within the City legally described on Exhibit A attached hereto, ("Property").

B. As a condition to the Owner's recording of the plat for Trillium Woods Apartment as approved by the City's Planning Commission's land use notice of decision DR2015-0122, Order No. 2469, Condition of Approval No. 50 of of such land use decision ("COA 50") requires that Owner grant certain easements for utilities and public vehicle access.

C. In satisfaction of COA 50, Owner now wishes to grant to the City the easements described in this Easement.

D. The "Easement Area" is the part of the Property as described and depicted on Exhibit B, attached hereto.

**NOW, THEREFORE**, in consideration of the above recitals, the terms and conditions of this Easement, and for certain other valuable consideration, the parties agree as follows:

### AGREEMENT

#### 1. Grant of Public Vehicle and Utility Access and Inhabitation Easements.

1.1 Subject to the terms and conditions set forth in this Easement, the Owner hereby grants, bargains, assigns, conveys, and transfers to the City a non-exclusive, perpetual access easement on, over, and across the Easement Area for the sole purposes of the following "Permitted Uses:"

(i) The Permitted Uses are (1) ingress to and egress from the Easement Area for "Official Public Vehicles and Personnel" (as defined below) and "Utility Vehicles and Personnel" (as defined below) (collectively, "Permitted Users") over the paved driveways as exist within the Easement

Area from time to time; and (2) installation, operation, and maintenance of the “Utilities” (as defined below).

(ii) “Official Public Vehicles and Personnel” are vehicles, such as fire trucks and other emergency response vehicles, owned by the City or any of its official agencies/departments having responsibility for and jurisdiction over response to emergency situations or circumstances on the Property that pose an imminent threat to human life or property, such as fire or other casualty, including official practice drills or exercises in preparation for readiness to respond to such situations or circumstances, but only while responding to such emergency situations or engaging in such official practice exercises, and the personnel employed by the City or City agency/department that owns and insures the Official Public Vehicle who are operating the Official Public Vehicle and/or helping to respond to the emergency situation or circumstance, or to effectuate the official practice exercise, and only during the time that the personnel is so engaged.

(iii) “Utility Vehicles and Personnel” are vehicles owned by the City or any of its official agencies/departments, or by a private entity, which vehicles’ sole purpose in entering the Easement Area is to install, maintain, or repair Utilities (as defined below); and all personnel employed by the City or City agency/department or private entity who are operating the Utility Vehicle and/or helping to install and/or maintain Utilities Infrastructure, but only during the time that the personnel is so engaged.

(iv) “Utilities” the facilities and infrastructure that provide water, gas, electricity, telephone and cable services, storm water, sanitary sewer, and similar services to the Property.

## **2. No Warranty.**

The City acknowledges that it accepts the Easement Area in its present condition, AS IS WHERE IS, without any representations by Owner about the condition or suitability of the Easement Area.

## **3. Standards of Use.**

Exercise of this Easement and use of the Easement Area pursuant to the grant of this Easement shall be solely for the Permitted Use by the Permitted Users and at all times in a good and workmanlike and professional manner and in accordance with all applicable laws, ordinances, rules, regulations, and orders with the force of law.

## **4. Disturbance and Repair of Easement Area.**

If the City or any Permitted User disturbs the surface of the Easement Area, the City or such Permitted User, as applicable, shall (a) minimize the time period of any such disturbance and (b) at its sole cost and expense, to restore the surface of the Easement Area to as good of a condition as existed immediately prior to the disturbance as soon as is reasonably possible.

## **5. Indemnification.**

To the fullest extent permitted by law, the City agrees to defend, indemnify, save, protect and hold harmless the Owner for, from and against all claims, causes of action, litigation, cost, loss, liability, damage and expense (including attorneys' fees) for injury or death to persons, whomsoever, and damage

37891-0067/134538187.1

to or loss of property, to whomsoever belonging, including environmental damage and any clean-up, investigation and/or remediation costs relating thereto, arising out of or in any way connected with the use of the Easement Area for the Permitted Uses in accordance with this Easement, except if such claims, causes of action, litigation, cost, loss, liability, damage and expense solely results from the gross negligence or willful misconduct of the Owner.

**6. Modification and Amendment.**

No amendment, modification, or termination of this Easement will be effective, except as otherwise provided herein, until the written instrument setting forth its terms has been executed and acknowledged by the Owner and the City and has been recorded.

**7. Effect of Easement.**

The rights and restrictions granted and reserved in this Easement will be appurtenant to the Property and perpetual. The easements, benefits, burdens, obligations, and restrictions created in this Easement will create covenants, benefits, and servitudes upon the Property as set forth herein, and will run with the land, and bind and inure to the benefit of the City. There are no third-party beneficiaries to this Easement and only the Owner and the City, and each of their successors and assigns, may enforce the terms of this Easement.

**8. Governing Law.**

This Easement will be governed by and construed in accordance with the laws of the state of Oregon.

**9. Attorney Fees.**

In the event that any party brings an action to enforce its rights hereunder, including, but not limited to, at trial, on any appeal, or while enforcing its rights in any bankruptcy proceeding, the prevailing party in such action is entitled to receive all costs and reasonable attorney's fees in addition to any damages to which it is due by reason of such action.

**10. Entire Agreement.**

This Easement contains the entire agreement and understanding of the Owner and the City with respect to the subject matter hereof and any prior agreements, representations or understandings, written or oral, with respect to these matters are hereby superseded.

**11. Counterparts.**

This Easement may be executed in one or more counterparts, which when taken together, will constitute one and the same original.

**12. No Public Dedication.**

Nothing in this Easement is a gift or dedication of any portion of the Easement Area to or for the general public or for general public use.

**EASEMENT FOR ACCESS IMPROVEMENTS AND ROADWAY USE**

THIS EASEMENT FOR ACCESS IMPROVEMENTS AND ROADWAY USE ("Easement") is made on \_\_\_\_\_, 2018, by **Trillium Woods, LLC, an Oregon limited liability company** ("Owner"), for the benefit of the property described on Exhibit A attached hereto and the current and future owners thereof as an easement appurtenant to such property (the "Benefited Property").

**RECITALS**

A. Owner owns the real property located within the City of Beaverton (the "City"), Washington County, Oregon, legally described on Exhibit B attached hereto (the "Trillium Woods Property").

B. Condition of Approval No. 50 of the City's Planning Commission's land use notice of decision DR2015-0122, Order No. 2469 ("COA 50") requires that Owner grant certain easement rights for the benefit of the Benefited Property to provide area on the Trillium Woods Property to accommodate a portion of a two-lane vehicle access roadway to and from the Benefited Property in connection with future development of the Benefited Property.

C. In satisfaction of COA 50, Owner now wishes to grant the rights described in this Easement.

**NOW, THEREFORE**, in consideration of the above recitals, the terms and conditions of this Easement, and for other valuable consideration, Owner agrees as follows:

**AGREEMENT**

**1. Grant of Easement.**

Subject to the terms and conditions set forth in this Easement, Owner hereby grants, bargains, assigns, conveys, and transfers to and for the benefit of the Benefited Property a non-exclusive, private easement on, over, and across the area of the Trillium Woods Property described on Exhibit C of this Easement (the "Easement Area") for the sole purposes of the following "Permitted Uses":

**1.1 Roadway Construction, Maintenance, and Repair.** Construction, maintenance and repair of a paved roadway and related vehicular and pedestrian access improvements (the "Roadway") in conformance with applicable City standards, including removal of parking spaces, trees (including trees

37891-0067/134868409.3

designated as 7061, 2540 and 2541 in that certain Tree Preservation Covenant granted by Owner of even date with this Easement and recorded in the official records of Washington County, Oregon), and other improvements within the Easement Area as necessary to accommodate such construction; and

**1.2 Use.** Use of the Roadway for residential vehicular and pedestrian traffic to and from a residential development on the Benefited Property.

## **2. Conditions.**

Without limitation of applicable law or equitable principles, the rights granted in this Easement are subject to the following conditions.

**2.1 Advance Notice.** As a condition to entry onto the Easement Area, the owner of the Benefited Property must provide at least **90 days'** advance written notice to the Owner of the Trillium Woods Property that the owner of the Benefited Property requires access to the Easement Area for the Permitted Uses pursuant to this Easement.

**2.2 Responsibility and Liability.** Construction, maintenance and repair of the Roadway and any and all work or activity associated with such construction (including removal of improvements or trees in accordance with this Easement) (the "Roadway Construction"), maintenance and repair shall be the responsibility of the owner of the Benefited Property and at the sole expense of the owner of the Benefited Property. The Owner of the Trillium Woods Property shall have no responsibility for performance of such work or be liable for any costs associated with it.

**2.3 Standards; No Liens.** All work and activities pursuant to this Easement by or for the owner of the Benefited Property shall be conducted and performed in a diligent, good and workmanlike manner that minimizes any interference with or disruption of use of the Trillium Woods Property; shall be in accordance with all applicable laws, ordinances, rules, regulations, and orders with the force of law; and shall be done in a lien-free manner, permitting no liens to attach to the Trillium Woods Property. In the event any liens are imposed upon the Trillium Woods Property in connection with any activities pursuant to this Easement, the owner of the Benefited Property will promptly bond over or otherwise discharge such liens so that they are not a lien and charge on the title of the Trillium Woods Property, failing which, the Owner of the Trillium Woods Property may do so and be entitled to reimbursement of all costs associated therewith from the owner of the Benefited Property.

**2.4 Insurance.** As a further condition to entry onto the Easement Area, the owner of the Benefited Property must ensure and provide evidence to the Owner of the Trillium Woods Property that the following insurance coverage is held and maintained by any persons entering onto the Trillium Woods Property for purposes of the Roadway Construction work or maintenance or repair of the Roadway following its construction:

**2.4.1** If required under state law, Workers' Compensation (Statutory amount) and Employer's Liability (\$1,000,000).

**2.4.2** Commercial General Liability insurance of \$2,000,000 for bodily injury and property damage on an occurrence basis. Extensions of coverage to include contractual liability, products and completed operations, cross liability, and pollution arising sudden or accidental releases.

**2.4.3** Commercial Automobile Liability insurance with minimum limits of \$2,000,000 per occurrence of bodily injury and property damage coverage. Coverage shall extend to all owned, hired, or non-owned vehicles.

**2.4.4** The policies specified in 2.4.2 and 2.4.3 above shall include an endorsement that shall name the then-current Owner of the Trillium Woods Property and its members (or other equity interest owners), property manager, employees, and agents (the "Owner Parties") as additional insureds on a primary basis. The additional insured endorsement must be ISO CG 20 26 11 85 (or other form with like wording). Additional insured status gives the additional insured rights of indemnity under the policies that are independent of the contractual requirement to indemnify.

**2.4.5** All liability coverage must be on an "occurrence" basis as opposed to "claims made."

**2.4.6** All insurance shall be in a form sufficient to protect the Owner Parties against the claims of third persons, and to cover claims by the Owner of the Trillium Woods Property against the owner of the Benefited Property for which the owner of the Benefited Property has assumed liability under this Easement by virtue of its exercise of the rights granted in this Easement.

**2.4.7** Prior to entry onto the Easement Area for purposes of the Roadway Construction work or maintenance or repair of the Roadway following its construction, the owner of the Benefited Property shall furnish the Owner of the Trillium Woods Property with certificate(s) of insurance, dated and signed by a stated, authorized agent for the insuring company or companies, and containing a representation that coverage of the types listed above is provided with the required limits. Owner reserves the right to require a certified copy of the policies or to examine the actual policies. Said certificates shall be sent to Owner at the address contained herein or otherwise delivered to the owner of the Benefited Property in writing.

**2.5 Indemnification.** The owner of the Benefited Property, to the fullest extent not prohibited by law, shall indemnify, defend, and hold harmless the Owner and the Owner Parties for, from and against any and all claims and/or liability for damages, costs, losses, and/or expenses (including any liability for or relating to investigation, cleanup or remediation of environmental contamination) resulting from, arising out of or in any way connected with the exercise of this Easement, activities pursuant to this Easement within or about the Easement Area or use of the Roadway pursuant to this Easement. The obligations of the owner of the Benefited Property indemnity obligation shall apply whether such liability is caused by or contributed to by the Owner or any Owner Party or any other party indemnified herein, unless caused by the sole gross negligence or willful misconduct of Owner or any Owner Party. In any and all claims against the Owner or any Owner Party by any employee of the owner of the Benefited Property, any contractor, anyone directly or indirectly employed by any of them, or anyone for whose acts any of them may be liable, the indemnification obligation herein shall not be limited in any way by any limitation on the amount or type of damage, compensation, or benefits payable under any industrial insurance act, workers' compensation act, disability benefit act, or other employee benefit act, and the owner of the Benefited Property hereby expressly waives any immunity it may have under such acts to the extent necessary or permitted under the law to assure the validity and enforceability of the indemnification obligations described above.

**2.6 Waiver.** Except to the extent caused by the gross negligence or willful misconduct of the Owner of the Trillium Woods Property or any Owner Party, the owner of the Benefited Property, for itself

and its successors and assigns, hereby waives, to the extent not prohibited by law, all claims against the Owner of the Trillium Woods Property or any Owner Party for damages by reason of death, injury, or property damage arising from the use of or activities on or about the Easement Area pursuant to this Easement or otherwise, including without limitation those occasioned by acts of nature, latent defects of existing structures or fixtures, and conditions of the Easement Area or Trillium Woods Property or any equipment or fixtures thereon.

**3. No Warranty.**

The owner of the Benefited Property, by virtue of exercising any rights under this Easement, acknowledges that it accepts the Easement Area in its then-present condition at the time of the occurrence of the Condition Precedent, AS IS WHERE IS, without any representations or warranties by Owner about the condition or suitability of the Easement Area.

**4. Remedies.**

In the event of any violation of any term or failure to perform any obligation set forth in this Easement, by any party hereto, without limiting any other rights or remedies available at law or equity, the other party may bring an action for specific performance or injunction.

**5. Modification, Amendment, and Termination.**

No amendment, modification, or termination of this Easement will be effective (i) without the express written consent of the Owner, the owner of the Benefited Property, and the City, and (ii) unless and until such modification, amendment or termination has been duly executed by the Owner, the owner of the Benefited Property, and the City and has been recorded in the official records of Washington County, Oregon.

**6. Effect of Easement.**

The rights and restrictions granted and reserved in this Easement will be appurtenant to the Trillium Woods Property and the Benefited Property and perpetual. The easements, benefits, burdens, obligations, and restrictions created in this Easement will create covenants, benefits, and servitudes upon the Trillium Woods Property and the Benefited Property as set forth herein, and will run with the land, and bind and inure to the benefit of such properties and any division thereof. There are no third-party beneficiaries to this Easement. If the Benefited Property is owned by more than one person, then the benefits and burdens of this Easement shall be joint and several rights and obligations of the owners of the Benefited Property.

**7. Governing Law.**

This Easement will be governed by and construed in accordance with the laws of the state of Oregon, without application of its rules for conflicts of laws.

**8. Attorney Fees.**

In the event that any party brings an action to enforce its rights hereunder, including, but not limited to, at trial, on any appeal, or while enforcing its rights in any bankruptcy proceeding, the prevailing party

in such action is entitled to receive all costs and reasonable attorney's fees in addition to any damages to which it is due by reason of such action.

**9. Entire Agreement.**

This Easement contains the entire agreement and understanding of the parties with respect to the subject matter hereof and any prior agreements, representations or understandings, written or oral, with respect to these matters are hereby superseded.

**10. Counterparts.**

This Easement may be executed in one or more counterparts, which when taken together, will constitute one and the same original.

**11. No Public Dedication.**

Nothing in this Easement is a gift or dedication of any portion of the Easement Area to or for the general public or for general public use.

[Signatures and acknowledgement on the following page]

IN WITNESS WHEREOF, this Easement has been duly executed as of the date first set forth above.

**From:** [Liz Balderston](#)  
**To:** [Steven Regner](#); [Chris McDowell](#)  
**Subject:** [EXTERNAL] Scholls Ferry Apartment Development Concerns  
**Date:** Friday, September 9, 2022 2:39:44 PM

**CAUTION:** This email originated from outside the City of Beaverton. Exercise caution when opening attachments or clicking links from unknown senders.

As a resident who has lived in Beaverton for 30 years and an abutting neighbor to the property in question, I wanted to address some questions and concerns with the development of the Scholls Ferry Apartments that is being proposed.

First of all, I would like to acknowledge that the developer has been open to listening to the concerns and has provided multiple revisions of the plan. I hope that they continue to do so as some items have changed and some concerns that have been stated from the beginning have still not been adequately addressed.

**Building Height and Landscaping:** The new plan shows 5 story buildings on top of an elevated grade (approx 9' at the south end). Building codes state that the maximum building height is 50'. The applicant states that the buildings shall not exceed 50' but the renderings appear to show the elevator penthouse and roofline to be higher than 50'. Even though the building placement has been adjusted to try to move farther from the single family homes to the West, this height will still overwhelm the existing homes. The applicant also states that their plan does not meet the landscape requirements on the Western edge. Since these homes will likely be some of the most heavily impacted, it is critical to protect them to the fullest extent and to at the very least meet landscape requirements.

**Traffic:** While there has been a Traffic Impact Analysis attached to the application, the TIA seems to only address the main arterial roads and does not address the burden to the neighborhood roads. The TIA states that this complex will generate 638 daily trips all of which will be funneled onto narrow neighborhood streets that are currently used by single family homes and are not designed for that level of traffic. This will dramatically change the feel and safety of the existing surrounding neighborhoods. The TIA also makes an incorrect assumption that 100% of the traffic will route to Scholls Ferry Rd. This ignores the fact that Barrows Rd has become a much busier connector and that Harlequin Dr connects to Barrows. This stretch of Barrows Rd and the residents who use it have had to deal with multiple accidents including the fatality less than a year ago that took one of our friends and neighbor. In addition to the loss of life, there have been numerous accidents that have caused injury and damaged property. This development will most certainly add traffic to Sheldrake and Harlequin Dr as well as that particular stretch of Barrows Rd. Code 60.55.15 states **Where development will add 20 or more trips in any hour on a residential street, a Traffic Management Plan acceptable to the City Engineer shall be submitted in order to complete the application. A residential street is any portion of a street classified as a Local Street or Neighborhood Route and having abutting property zoned RMA, RMB, or RMC. [ORD 4584; June 2012] [ORD 4822; June 2022]** I did not see a Traffic Management Plan to address this.

**Parking:** While the code states that there is a minimum of 1 parking space per unit, this particular development is only estimated to add 22 children to the Beaverton School District. This implies that the units will be mostly filled with adults, the vast majority of which will have cars. Making a conservative estimate that if even half of the units have 2 cars, that will be 144 vehicles. Since there are 129 spaces, this would be 15 cars that would be looking for spots

to park in the surrounding neighborhoods. This again will change the feel and safety of the neighborhoods.

I am not an expert in development or city code so I apologize if something was missed. Thank you for your attention to these concerns.

Sincerely,  
Liz Balderston  
12320 SW Harlequin Dr

Planning Commission,

I am very concerned about the proposal of the Scholls Ferry Apartments in the latest rendition of the land involved.

First of all, the amount of trees that will be removed will ruin the aesthetic beauty viewed from all of the houses on SW Sheldrake Way and on SW Winterhawk that face east. Trees also provide oxygen to the atmosphere, enabling the community to breathe the fresh air that Oregon citizens and visitors enjoy.

Second, removing the house at 12210 SW Sheldrake Way to make way for an entrance to the apartments ruins the quiet neighborhood in many ways. Apartment complexes never have enough parking for all of the tenants, bringing the overflow to park along SW Sheldrake Way. It will also create much more traffic on SW Sheldrake Way than the street was designed to handle. It will add a significant amount of noise to the neighborhood, not just during the day, but the evening and late at night as well.

Third, the house that currently sits on the property of 12210 SW Sheldrake Way is a house of beauty and value to the neighborhood. As the old Joni Mitchell song goes, "They paved paradise and put up a parking lot." I, for one, would not like to see the house torn down to create a driveway for the apartments.

Please consider another alternative on this project, including a rejection to the developer. Our green spaces are getting smaller each year. We need to preserve what green spaces we have, not decrease them further.

Regards,  
Julie Beck  
owner of house at 12285 SW Sheldrake Way

Hi,

I would like to make my concerns on the proposed apartments known

1. Previously, the neighborhood had expressed concerns at the numbers of new units/anticipated cars and, even with that now reduced, as access to the property will be via Winterhawk lane and Bunting St. - traffic will circulate to/from the sites via these roads. This means that not only will we have the traffic from the new apartments, the Trillium Woods apartments can also access the Winterhawk lane/ Windsor Park area resulting in many cars feeding through local streets. There are many families who are used to using these local streets for recreation and fear for the additional traffic and noise expected.
2. There seems to be no confirmation or traffic study for cars going down Harlequin Dr towards the Barrows road end of the estate - every report only mentions the Scholls/158th or Scholls/Sagehen end. We already experience speeding through traffic from Barrows to Scholls to access other areas.
3. In the traffic report (Exhibit J page 3) it states " The current site's access is from SW Scholls Ferry Road which is not suitable for a full vehicular access to and from the proposed site and with available stub streets to the west (SW Winterhawk Lane) and to the east (SW Bunting Street) and based on conversations with City of Beaverton and Washington County staff, it is more desirable to circulate traffic to and from the proposed site by connecting to the mentioned stub streets that have been marked and identified as future connections" What exactly does "more desirable" mean - Is this a requirement or just a group of people's preference, could the Scholls entrance be upgraded for access?
4. Exhibit T page 41 states that there is not sufficient bufferring to current properties " the proposed development does not meet the minimum landscape and buffering design standards along the western property boundary."
5. Exhibit N - Bald eagle assessment. This was carried out over 2 1/2 years ago. We continue to have bald eagles in the neighborhood, maybe even increasing year to year - is there a plan to revisit this?

Thanks for your time, please let me know if you need any more details on my concerns.

Neil Crampsey

**CAUTION:** This email originated from outside the City of Beaverton. Exercise caution when opening attachments or clicking links from unknown senders.

Hello Steve,

We are residents on sheldrake way. We have several concerns regarding the Scholls Ferry Apartments project.

1. The winterhawk lane is currently a cul de sac where kids in our neighborhood play, run, and ride bikes everyday. If they open it up, it will bring so much danger to the kids in our community. The winterhawk lane and sheldrake way are both roads in a quiet neighborhood. How are you going to handle the added traffic? 300 hundred more cars are going though the road which was built for 30 cars in the area. Are you going to add speed bumps and stop signs?

2. the parking spots in the apartment planning is not enough for their residents. They will for sure park their vehicles in our neighborhood. If cars can be parked on both sides, the road is not going to be wide enough. Are we going to restrict parking on the street or change it to a one way street? It's also going to make it hard to have fire trucks or other large vehicles to travel through.

We love living in this neighborhood, but if we knew all the trees on the lot next to our backyard will all be cut down and turned into apartment buildings, we would not have considered moving here at all.

Regards,  
Wenting Guo

I am providing the following comments regarding the proposed Scholls Ferry Apartments. I received the notice of public hearing and have reviewed the application submitted by Placid Holdings. According to the application, the development contains ninety-six (96) units consisting of forty-eight (48) one- bedroom and forty-eight (48) two-bedroom units. One-hundred and twenty-nine (129) vehicle parking spaces are provided; seventy-one (71) on-site surface parking spaces, twenty-six (26) spaces in the ground floor garage of Building 1, and thirty-two (32) spaces in the ground floor parking garage of Building 2. Vehicle access will be provided to the development with connections to SW Winterhawk Lane and SW Bunting Street. Pedestrian and bicycle access is proposed from the development to connect to SW Winterhawk Lane and SW Scholls Ferry Road.

My main concern with the proposed development is the impact the additional traffic will have on the adjoining neighborhood, Windsor Park subdivision. I have lived at the corner of SW Sheldrake Way and Harlequin Drive for almost 20 years. My family and I have lived in several places throughout the country, including Louisiana and Virginia. We were happy to live in an area the protected rural areas through higher density development. We've watched the development of Cooper Mountain and Progress Ridge areas and the commercial developments in Progress Ridge, which increased our home values, largely based on walkability of the surrounding areas and the construction of the new high school. Planning for these new communities came with traffic considerations, including the widening of Scholls Ferry, Roy Rogers and 170th, including traffic circles on Barrows and 170th.

While the new developments have been supported by new roads or widening of existing roads, the proposed Scholls Ferry Apartments will rely on the existing streets in Windsor Park for access to main arteries, including Scholls Ferry and Barrows Roads. The planned development will have 96 units, half 2 bedroom half one bedroom. Conservatively, that would likely involve 144 cars, and the developer is proposing 129 parking spaces. Any overflow parking will be bleed into the adjacent neighborhood on Winter Hawk, Bunting and Sheldrake Way and Harlequin, and likely beyond. These are residential streets, with Harlequin Drive and Sheldrake Way providing the main access for the entire Windsor Park neighborhood. There are approximately 170 houses throughout the neighborhood with the associated traffic from those residents. The increased traffic will primarily impact those living on one block of Winterhawk where it connects to Bunting, one block on Winterhawk to where it connects to Sheldrake Way, then Sheldrake to the intersection of Sheldrake Way and Harlequin Drive. Winterhawk is a loop so current residents along Winterhawk also use that route to access the neighborhood, with a total of maybe 20 houses and associated vehicles, maybe 50 at most. The proposed development at a minimum will more than double the amount of traffic currently using the route from the one block of Winterhawk to reach Sheldrake and on to Harlequin to either 158th to Scholls or Barrows.

High density housing has to consider the impacts of resultant traffic. Funneling the amount of traffic being proposed onto a small neighborhood street greatly increases the risk of vehicle and pedestrian accidents. While there is a light at 158th and Scholls Ferry, currently there can be anywhere from 2 to 5 cars waiting for the light; this complex will exponentially increase the amount of cars idling at that light. Per state mandate, the Windsor Park neighborhood is being evaluated for ADUs which will also increase traffic in the immediate area. In addition, residents of neighborhoods near Barrows Road have been working with the City to address the increasingly dangerous traffic situation on that road; a number of fences/walls have been destroyed by drivers, and there was a recent pedestrian fatality on 157th and Barrows where Windsor Park feeds into Barrows Road. The city has agreed to conduct a traffic safety study, and recently installed a speed notification along the road.

There are a number of parked cars on the street currently all throughout the neighborhood, the driveways are simply too short to accommodate more than 2 cars and in my case the garage is

## Beaverton Planning Commission

too small for anything but a compact. The lack of adequate parking in the proposed development will require the residents of the apartment complex to look elsewhere; the adjacent existing apartment complex can't provide additional parking which leaves Windsor Park to provide additional street parking. Restricting parking in Windsor Park places the entire burden on the subdivision's residents to police parking, not the manager/owner of the proposed apartment complex. With increased traffic comes a higher incidence of speeding, speed bumps may slow traffic but it doesn't decrease use particularly in an area with only one access route.

High density housing has to consider the resultant impact of increased traffic in existing neighboring areas. Because the proposed development is apparently prohibited from directly accessing Scholls Ferry Road, all residents from the 96-unit multifamily development will access through a small neighborhood adjacent to the development. Although the city did plan on access to Windsor Park via Bunting and Winterhawk, at the time that access was planned (Windsor Park was constructed in the 1990s) it likely did not consider use of that connection by a high density development that would more than double the amount of traffic in a small residential community.

I urge the planning commission to consider the traffic and safety concerns that would result from the proposed development. If the Commission has not yet visited Windsor Park, I would urge them to do so, to get a sense of how small this neighborhood is and the amount of traffic it currently has and the impact such a large increase would have on the community.

Thank you for your time

CAUTION: This email originated from outside the City of Beaverton. Exercise caution when opening attachments or clicking links from unknown senders.

Good afternoon, Our neighborhood is showing much displeasure to the ongoing application process for this unwanted structure in our area. With all the new construction in Beaverton in undeveloped areas we can expect but in a quiet neighborhood that was established in 1994, this is a real shame. To cut down trees, overcrowd our street, increase traffic and raise potential crime that we pay a massive amounts of property taxes and thinking the City of Beaverton doesn't care about these concerns is devastating motion !! We understand for a multiple family apartment building there is Not ample parking so, do we expect these vehicles to be parked on our streets? YES we do. We purpose if you decide to approve this unwanted building, that there will be no overnight parking on Sheldrake Way and adjoining streets. Lower speed limit to 20 mph. Have more police presence, to enforce parking and noise nuisances. We certainly hope and pray the city rejects this application with no hope it surfaces again. Thank you, Thomas Rayner and neighbors on Sheldrake Way

Hi,

I am writing in as a concerned member of the Trillium Woods Apartments. I have learned that there is a plan to put apartments right behind our complex in what is left of the beautiful wooded area. First off, I live RIGHT on the end of the complex next to the woods and I have deer and wildlife come up to my patio- I give the deers water, and this is taking away their home....Beaverton has NOTHING left- this was one small safe place for them. Second, there is NO parking already in our area- please don't add more people to already a VERY OVER POPULATED area. Third, I have an anxious rescue dog, and he would not be good with any construction- he hardly can handle amazon trucks going by, I would have to move. I have lived in this area my whole life. I love this area- but please don't do this to our community. We have kids who play out in the woods, and the trees are just a small breath of fresh air in this crazy busy world. I am asking from the bottom of my heart to NOT go forward with this. We have enough apartments around this area already. WE DO NOT NEED MORE! Please feel free to contact me with any questions.

Thank you so much!

-Marissa Adams

Hello,

I was notified by a fellow apartment member where I live at Trillium Woods apartments that there will be a possible new apartment building right behind us. I'm voicing my concern, this area already has so many houses and apartments packed into it. I know we need to have places to build housing, but there should be a little buffer zone in my opinion, there is a small forest area that surrounds our apartment complex at Trillium Woods and it is very nice. It would be lame if all the trees disappeared and got removed. Please build this complex somewhere else.

Thank you very much.

I hope you have a blessed day!

Seth Cowell

**Date:** Monday, September 19, 2022 7:09:57 AM

**CAUTION:** This email originated from outside the City of Beaverton. Exercise caution when opening attachments or clicking links from unknown senders.

Hello,

It has come to my attention potentially there will be a complex built behind our property line at trillium woods off scholls ferry on sagehen in Beaverton near progress ridge. In the plans it states our small community with limited parking and space will have people driving through to a shared driveway to the complex they are building.

I am writing to explain how this is not something our community needs. We have several apartment complexes in our area, we have 5 complexes in a half a mile radius.

Parking is limited to the point we can't have guests park here. No additional spots and with a 3 story complex that will add to our headache. We have children playing in the lot because it's closed off. If it is open now we have people driving quickly through disregarding children that play tag or do outdoor activities.

The wooded area is where we get the name trillium woods the trees flowering now are trillium Flowers. We have hawks, deer, bunnies, raccoons, mice, rats, birds like a spotted owl. The wildlife has nowhere to go if you remove that area. The trees thriving giving us a sense of an escape from the city, where would they go? You can't relocate a tree that large. It makes no sense to ruin a spot so beautiful and full of life for something like this.

My children play here and this plan to build will ruin the beautiful area we call the bubble. This world is fragile and there is plenty of apartments, what this area needs is affordable homes. I don't want this apartment complex off scholls ferry to take place. It is not needed and would require the removal of a wooded area that we all enjoy.

I hope you will help us,

Thank you

**CAUTION: This email originated from outside the City of Beaverton. Exercise caution when opening attachments or clicking links from unknown senders.**

Hello Mr. Regner,

My name is Magie Arroyo. I live in the corner of Sagehen and Scholls Ferry. I am writing to you to plea to keep the tree grove alive. The trees have been here before we were and they add health and beauty to us and home thousands of birds and passing wild life.

Yes, we need affordable housing in the area, but this lot should continue to be residential use only. I have little kids and they enjoy walking by the woods and observe the birds. This has been a family activity since I bought my house in 2016. I actually bought my house because of trillium woods, I wanted to give my kids the gift of majestic tress right across our street. I cried like a little girl when the half the trees were gone, 2 days after I moved in; to allow Trillium apartments.

We have parking issues in our little neighborhood. The overflow parking of the current apartments uses the circle we have in the area and making it a nightmare to find parking for our visitors. I also already have issues of traffic blocking my driveway each morning, a couple of times it's taken over 5 minutes before I can leave my driveway and start my day. This will only get worse if Sagehen is the only entrance to the new development. I've seen firetrucks struggle already to enter and exit the apartments.

I started a petition last year to save the woods and gathered over 300 signatures currently. I am locked out of the account as I cannot remember the password and I no longer have access to the email address I used when I set it up, but please see attached for the July 2021 download signatures.

<https://www.change.org/savetrilliumwoods>

I've talked to several neighbors and not one has been in support of losing the tree grove.

Please - Please I implore you to consider our environment and wellbeing for all of us today and for future generations to come.

Thank you for reading my words and I hope together we can save the trees!

Happy Monday,

Hello officer of city planning,

Please allow us to share some concerns with regard to the potential new construction of Scholls Ferry Apartment near the SW Winterhawk Lane neighborhood. Members of our community have put a lot of efforts in making the SW Winterhawk Lane neighborhood a very quiet, friendly, and kids-safe neighborhood. Oftentimes, you can see kids from the community play, run and ride bikes on SW Winterhawk Lane and SW Sheldrake. We truly appreciate and enjoy the living quality here. However, after learning that there may be a new construction of 96 units Scholls ferry apartment with only one exit/entrance open on the SW Winterhawk Lane, we have some concerns about the safety of the community.

We welcome new neighbors in the community, but we think limited units such as single houses or town houses would be much suitable and not impact current residents. The following are our concerns:

1. Only one exit/entrance on the Winterhawk Lane
  - All residents of the new apartment will have to share only one exit/entrance on the Winterhawk Lane. This may cause issue of traffic flow. Most importantly, it can be a great safety concern should there be any emergency or needs of evacuation. This would definitely put residents of the Winterhawk neighborhood in danger as well.
  - It can be anticipated that, with only one exit/entrance, construction vehicles will have to go through the Winterhawk Lane. We are deeply concerned that would ruin our living quality entirely with all the traffic and noises.
2. Overflow parking
  - The application of the new construction may meet the minimal requirement of construction regulation. However, with 96 units, we are afraid that there is no sufficient parking space built in the apartment. Consequently, we can foresee the overflow parking along the Winterhawk and Sheldradke. We are concerned about the capacity of the two roads as they are not very wide. This would further limit the traffic flow in the neighborhood as well.
3. Children's Safety issues
  - With the anticipation of more street parking and increased traffic, we don't believe that it will be safe for children and families from the community to play and run anymore.

For above reasons, we think the negative impacts of this 96 units apartment proposal would outweigh positive impact to the community and neighborhood.

Thank you for your time and patience to take our concerns into consideration.

To whom it may concern,

My family and I live in Trillium Woods. I am writing this email to oppose the construction of Scholls Ferry Apartments. This building project would only create more havoc with parking situations and traffic patterns. Along with this the destruction of the woods themselves would be a devastation to the community. These woods provide habitats for animals, as well as keep our community looking beautiful. We do NOT want this built in our community.

Thank you,  
John Miller

CAUTION: This email originated from outside the City of Beaverton. Exercise caution when opening attachments or clicking links from unknown senders.

To whom it may concern,

I am writing to express concern with the proposed construction of new apartments next to where I currently live.

I do not agree with the proposed construction for a few reasons. One being that this would add congestion to where I currently live along with nearly eliminating parking availability. In addition this would create more pollution (both atmospheric and audial), which negatively impacts my health and those neighboring.

I moved to Trillium Woods for reasons mentioned in the name. Woods. I believe observing nature on my back patio is very therapeutic and I would despise it greatly to see the woods destroyed. Not only is this good for my personal health but also for the animals that call it home.

I moved to Trillium in May and I absolutely love the community. I believe there is a lot of great opportunity to live here and I would not want to be forced to move due to this building proposition. I hope that this project does not get approved for the sake of my community's health, along with prolonging the life of animals and nature around us.

-Skylar Job

Hi Steve,

My name is Natalie Frainey. I would love the opportunity to speak at the meeting on Oct 19th at 6:30. My family suffered a tragedy this spring and I think my perspective and experience would be helpful for the decision makers to hear regarding safety in the neighborhood. Can you please let me know how my voice can be heard?

Sincerely,

Natalie Frainey

**Subject:** [EXTERNAL] Opposition to New Apartment Complex Behind Trillium Woods Apt

**CAUTION:** This email originated from outside the City of Beaverton. Exercise caution when opening attachments or clicking links from unknown senders.

To whom it may concern,

I am writing to you to express deep concern and opposition over the city's plan to build a new apartment complex next to the current Trillium Woods Apartment complex. As a resident of several years, I have greatly appreciated the remaining forest area behind the complex. It was one of the major reasons why I had dreamed of living in this neighborhood years before I was actually able to. It brings me peace and joy to have the view of nature as I look out my window - especially when we live in a society that is becoming more and more industrialized. I have great privilege to be able to live in an apartment with such a beautiful neighborhood and I hope we can keep it that way to preserve our precious environment for generations to come.

In addition, if plans for this new complex do go through, there will be great disruptions due to construction and even poorer traffic management than now. I imagine this will not be a pleasant place to live, especially for the increased number of young children/families that have decided to reside here. We already have very inconvenient, limited parking due it being a densely populated neighborhood and I expect it to get worse with increased residents in the area.

I hope you will reconsider. Thank you for your time.

Resident - City of Beaverton

Hi Steve,

Thank you for reaching out and sending the link. I am hopeful that you have time to answer a few questions.

1. Has there been a traffic study done since 2019? I think this was mentioned at the previous meeting. That is so old that it doesn't account for the additional traffic in the area from all of the new construction. It doesn't reflect that there are new traffic patterns with more people working from home since the pandemic. Many employees are either working from home full time or have a hybrid schedule. It's highly unlikely that 100% of the traffic would exit on Scholls Ferry Road when Barrows is right down the street.
2. Can you share with me why the apartments cannot exit onto Mallard? It was built thoughtfully for more traffic since no properties exit directly onto Mallard.
3. Has the lack of parking been addressed?
4. Are there any specific codes that would answer these questions or help consider alternate options for traffic through a quiet neighborhood with lots of children, walkers and pets? Keeping my community safe is very important to me.

Thank you in advance for any help you may be able to offer.

Sincerely,

Natalie Frainey

Good Afternoon Natalie,

Thanks for reaching out about the Scholls Ferry Apartments. Our recommended method of testifying is virtually via the Zoom webinar.

You can find the link to the zoom webinar and login instructions here: [Agendas & Minutes | Beaverton, OR - Official Website \(beavertonoregon.gov\)](#)

Please be aware that each member of the public will be limited to five minutes of testimony, not including any follow up questions from the Planning Commission.

Please let me know if you have any other questions.

Thank you,

**Steve Regner**

Hi Steve,

My name is Natalie Frainey. I would love the opportunity to speak at the meeting on Oct 19th at 6:30. My family suffered a tragedy this spring and I think my perspective and experience would be helpful for the decision makers to hear regarding safety in the neighborhood. Can you please let me know how my voice can be heard?

Sincerely,

Natalie Frainey
