why do you ask for this when you are going to do what ever you want anyway
i have protested the flooding area you proposed and the landslide zones and you just say there is a possibility
so what
meteors could hit us too!
why dont we look at the last 50 years or a 100 and say nothing has happened so probably wont
but could
kim

MY property is NOT a landslide risk and if that is so you should evacuate the murray hill area for the same reasons
