To the City Council,

The improvements to the athletic fields at West Sylvan Middle School are necessary for the youth in the Lincoln school boundaries and will also benefit the West Slope neighborhood association, as residents in the area also will be able to use the new facilities. Any issues that the West Slope NAC may have with the increased use of the athletic fields can be negotiated between the various Lincoln athletic programs and the association to the satisfaction of both parties. Those issues will develop over the course of many years as the scope of the impact becomes clearer, but to deny the improvements based on projected issues that may or may not come true, and without the opportunity for both sides to have these discussions would be to deny future generations of youth athletes the chance to further their athletic pursuits. Please vote NO on the appeal and say YES to our children.

Thank you!

Rene Ferran
