Subject: 7400 sw scholls ferry Verizon tower

Please do not allow this tower to be built in our neighborhood. I have read all 28 pages of Verizon report from January 9th and we disagree. We disagree with the height and safety of the tower. We do not want this in our neighborhood. We would rather have less phone reception than a tower that adds potential radiation levels to our neighborhood. We believe, that if built these towers need to be located near places where people are not living and working, or near schools. There are more industrial areas nearby where people are passing thru, but not living that make more sense if there is unknown risks. Enough science and people believe these reports that the fact and result would be to lower all of our property values by placing this here. Please do not let Verizon build on our unincorporated area- because someday we will probably be part of Beaverton and you do not want to have this in one of your most livable areas, one with established trees and homes, and schools.
